Running From Cambodia

WHO WE ARE ?

Money Bricks is not a bank. Money Bricks does not collect your money. Money Bricks is not an online business, HYIP, investment or MLM program. Money Bricks is a community where people help each other. Money Bricks gives you a technical platform which helps millions of its members worldwide to connect those who NEED help with those who are willing to Provide Donation, for FREE. All funds you transfer to another member represent help you provide of your own good will, absolutely gratis. If you are completely confident and certain of your actions and have made up your mind to join the community, we kindly ask you to carefully study all warnings and instructions first. Should you have any questions regarding the topic, our online consultants are willing to help and answer all of your questions.

OUR IDEOLOGY

Money Bricks is a community of people providing each other financial help on the principle of gratuitousness, reciprocity and benevolence. In Money Bricks you don't have to make contracts or pledge your property. In Money Bricks there are no lenders and no debtors. Everything is very simple: one participant asks for help — another one helps.

The only thing that Money Bricks demands from its participants is to be honest and kind to each other. You ask for financial help when you need it, you give financial help when you are able to do it.

There is no central account, where all the System money flows to (and where it can be easily stolen from :-)). All the money is only on the banking accounts of the participants themselves! On a lot of thousand and million private accounts. Participants transfer to each other directly, without intermediaries! (What are they for? :-)) In fact, Money Bricks only regulates the process — nothing more. So the System completely belongs to people. No kidding! It is a real mutual aid fund where ordinary people help each other.

What is Legality ?

- MONEY BRICKS is a community of people who voluntarily help each other without any reservations. They transfer assistance directly from one blockchain account to another, without any conditions, guarantees, or promises.
- There is no formal organization or legal entity associated with MONEY BRICKS, and it doesn't maintain a central bank account.
- No special registrations, permissions, or licenses are required here. (Why would permissions and licenses be needed for transferring money from one person to another?)
- Every participant is fully informed about both the potential and inherent risks right from the beginning. During registration, everyone acknowledges that they have read and understood the warnings.
- MONEY BRICKS is dedicated to transparency, open communication, and does not withhold information. Everything is conveyed honestly and openly to its members.

Our Goal

The primary goal of MONEY BRICKS is to create a P2P and transparent financial ecosystem where individuals can freely and securely exchange funds directly with one another. This system aims to promote financial inclusion, empower people with the opportunity to achieve financial independence, and foster a sense of mutual assistance within a global community. MONEY BRICKS seeks to establish a fair and equitable financial relationship among its participants, ultimately contributing to greater financial freedom for all.
